YANCEY BROS. CO., GEORGIA'S CATERPILLAR DEALER SINCE 1914

Since 1914, Yancey employees have proudly served our customers in the Construction, Road building, Mining, Aggregates, Forestry, Manufacturing, Transportation, Marine, Healthcare, Data Center, and Agricultural communities by providing them with quality products, parts, and service.

From our earliest days to the present, Yancey strives to offer our customers the highest level of products and services available. We remain committed to learning more about our customers and their business, offering equipment, and support to keep up with their changing needs.

As we continue into our second century of service to Georgia, the employees of Yancey work hard to make our state a better place for all of us to call "home." Our employees' involvement with community groups, civic and church organizations, and hundreds of charities is just an example of our commitment to Georgia.

Likewise, our employees get up early and work hard each and every day to make sure our customers receive first-class quality services. We believe that if our customers are not successful, then Yancey can't be successful.

YANCEY HISTORY »

Founded in 1914 by brothers Goodloe and Earle Yancey, Yancey Bros. Co., began as the Yancey Hardware Company, selling hardware, picks and shovels to government agencies for road construction. From their Peachtree Street location in downtown Atlanta, the brothers became the first dealer in the United States for the Adams Mule Grader, a predecessor of today's motor grader, which was pulled by eight mules.

In 1918, the Holt Manufacturing Company of Peoria, IL boasted that its Model 45 tractor could do the work of, "40 mules . . . or 40 horses and countless humans." Goodloe and Earle traveled to Peoria to ask Holt if they could represent the product in the southeastern United States. Unable to secure a demonstration tractor, Goodloe and Earle left Peoria with only a photograph of the Holt Model 45 and a price quote of \$4,750 per machine.

Yancey's first Model 45 delivery came later that year to Troup County, Georgia.

Within 12 months Yancey had sold all of the Model 45's in Holt's inventory, using only a photograph. When Goodloe and Earle returned to the Holt factory in Peoria the following year, they were given Holt's first jobber's contract.

In 1925, Holt merged with Best Tractor Co., to become the Caterpillar Tractor Company. Caterpillar's records indicate that, based on the original 1918 agreement, "Yancey is the dealer with whom Caterpillar and its predecessor companies have had the longest business association." Thus, Yancey Bros. Co., is proud to own the title of "The Nation's Oldest Caterpillar Dealer."

In 1927, the brothers split the territory with Goodloe operating the company for the 83 counties in the northern half of the state as Yancey Bros., Inc., and Earle operating out of Albany as the Yancey Tractor Company for the southern half of Georgia. Joining Earle in Albany as General Manager of Yancey Tractor

was another brother, L.D. Yancey, the father of a future generation of Yancey brothers, Don and Goodloe III.

In 1947, Yancey Bros., Inc., opened its first full-service product support branch in Augusta and adopted the current name of Yancey Bros. Co. Four years later Yancey Bros. Co., relocated to a 12-acre site at 1540 Northside Drive in Atlanta. In 1957, the company opened its second full-service product support branch in Macon.

Don A. Yancey, a nephew of Goodloe, began his career in 1936 with the Yancey Tractor Co., in Albany. After serving in the U.S. Army during World War II, Don joined Goodloe at Yancey Bros. Co., in 1946 and became President of Yancey Bros. Co., in 1959.

In 1969, the company relocated to its current headquarters in Austell, four miles outside Atlanta's I-285 perimeter highway.

In 1974, Goodloe H. Yancey III assumed the presidency of the company upon the retirement of his older brother, Don. Goodloe III had joined Yancey Bros. Co., twenty years earlier as a sales trainee after serving in the U.S. Air Force. Under Goodloe's leadership, the company opened branches in Calhoun, Gwinnett County and Columbus, and its first full-service truck engine support branch. The company also acquired the Grissom-Harrison Corporation and formed Sunbelt Power Systems, now known as Yancey Power Systems.

In 1994, Jim Stephenson joined Yancey Bros. Co., and became the fourth generation to serve as President and CEO. The Cat Rental Store® opened in 1997 and continues to provide Caterpillar's full line of construction and building equipment to customers with daily, weekly and monthly rental options.

In 2002, Yancey Bros. Co. reunited north and south Georgia under a single Caterpillar dealer with the purchase of the operating assets of Carlton Co., the Caterpillar dealer in the southern half of the state.

In 2005, Yancey Power Systems established Yancey Engineered Solutions to provide specialized design and packaging services for Cat® generators.

In 2007, Yancey Bros. Co., was appointed the exclusive Blue Bird bus dealer for Georgia. Yancey Bus Sales and Service

provides an extensive line of parts and aftermarket services for school buses of all makes and models.

In January of 2019, after 23 years of leadership, Jim Stephenson retired as CEO. Upon Jim's retirement, Trey Googe assumed leadership of the Company and the position of CEO, becoming the fifth generation to lead Yancey Bros. Co., Googe joined Yancey Bros. Co., in 2007 and was appointed a Dealer Principal by Caterpillar in 2015.

Yancey Bros. Co., remains committed to learning more about its customers, offering equipment and support to keep up with their changing needs. Harmon S. Eberhard, the President of Caterpillar, Inc., wrote to Mr. Goodloe in 1958 with these words, "through these years, Yancey Bros. Co., has succeeded admirably in balancing its record of 'seniority' with an equally fine record of aggressiveness, vigor and growth — qualities often associated with a younger organization. If I could define in a few words the job awaiting the future generations of Yancey Bros. Co., I believe

it is just that: to continue to combine the wisdom that comes from long experience in this business with a willingness to change and progress in keeping with the challenge of the future's markets." These words remain as true today as they did over fifty years ago.

In 2014, Doug Oberhelman, CEO of Caterpillar, commented on Yancey's service to Georgia by saying, "To imagine a company for 100 years, under the same ownership, with the same name, as successful as it's been for 100 years, is nothing short of a miracle. It says an awful lot about the family and about its leadership. So, I congratulate you all for being the oldest Dealer in the United States."

Chairman Oberhelman went on to say, "The relationship between Caterpillar and our Dealers has never been stronger. It's a relationship that started really with Yancey Brothers back in 1914, when the two Yancey brothers came up to Peoria, took all of one year's production of our old tractors, and the Dealer model began right there."

CONSTRUCTION EQUIPMENT »

Whether your business is residential construction, landscaping, road building, or any other heavy construction industry, your productivity rests on the performance of your earthmoving equipment. We sell, rent, and service a wide range of construction equipment that works hard for your business and provides exceptional value. Caterpillar is known around the world as a leader in construction equipment thanks to a focus on durability, versatility, and performance. Our complete range of earth moving equipment provides the technology you need to put your construction application capabilities on the cutting edge. Count on Yancey Bros. Co. for the machines, tools, and attachments capable of boosting your productivity.

- Deliver the productivity you need while reducing your operating costs
- Sophisticated GPS technology and innovative electronic controls
- Accugrade™ Grade Control Systems with up to a 40 percent increase to productivity
- Maximum return on investment – our machines continue to operate at peak levels for years to come

- Articulated Trucks
- Dozers
- Excavators
- Motor Graders

- Backhoe Loaders
- Track Loaders
- Wheel Loaders

COMPACT CONSTRUCTION EQUIPMENT

Cat® Compact Construction Equipment may be compact, but these “small” machines have big iron features. At Yancey, you get the high-quality compact equipment specifically suited to your application requirements. Our compact construction equipment lineup includes lightweight, yet powerful machines specifically designed for maximum maneuverability when performing various digging, earthmoving, material handling, and loading tasks in confined areas. These compact machines also offer a more cost-effective alternative to larger equipment, while giving you access to advanced comfort and control features that will improve operator performance and productivity.

- Ideally sized for smaller job sites such as residential, lot clearing, landscaping, tight construction sites
- State-of-the-art technology capable of providing improved operator performance, and greater fuel efficiency for a safer work environment
- Tough, durable, versatile, and powerful

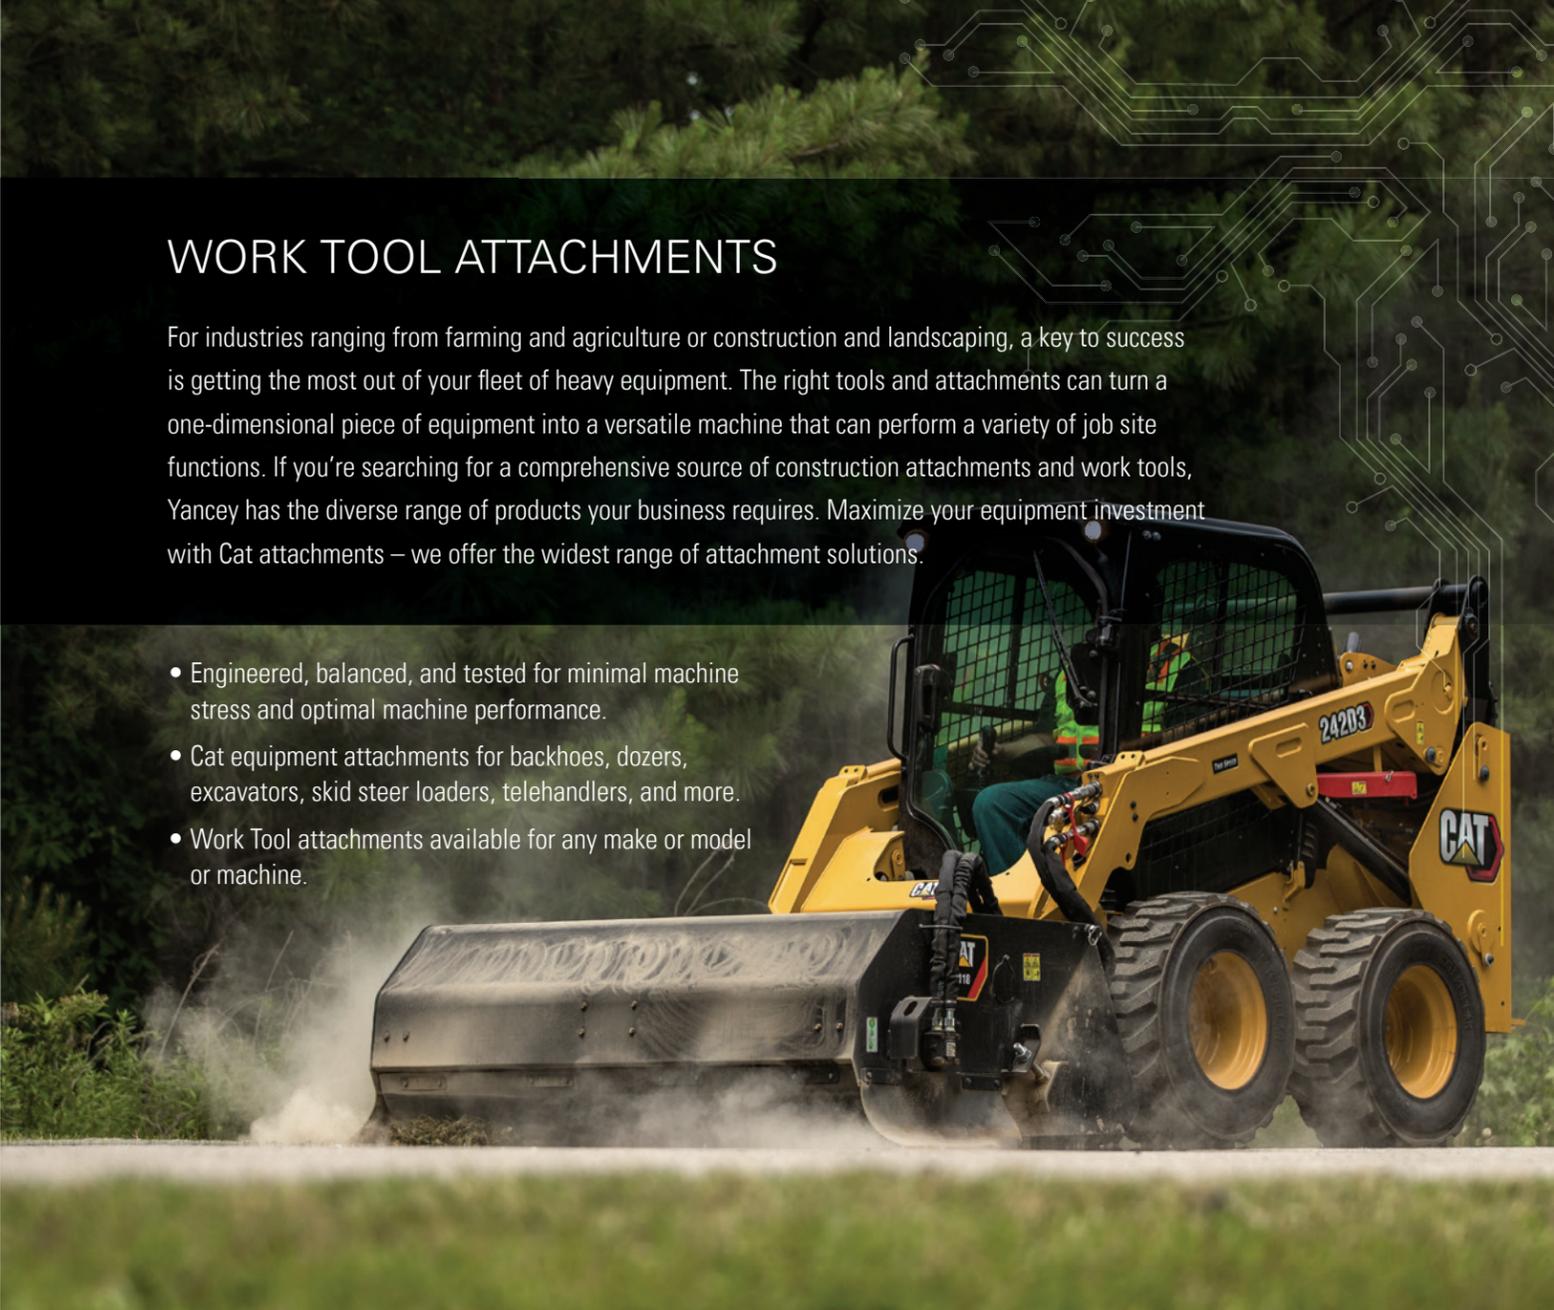

- Compact Track and Multi Terrain Loaders
- Compact Wheel Loaders
- Mini Excavators
- Skid Steer Loaders

WORK TOOL ATTACHMENTS

For industries ranging from farming and agriculture or construction and landscaping, a key to success is getting the most out of your fleet of heavy equipment. The right tools and attachments can turn a one-dimensional piece of equipment into a versatile machine that can perform a variety of job site functions. If you’re searching for a comprehensive source of construction attachments and work tools, Yancey has the diverse range of products your business requires. Maximize your equipment investment with Cat attachments – we offer the widest range of attachment solutions.

- Engineered, balanced, and tested for minimal machine stress and optimal machine performance.
- Cat equipment attachments for backhoes, dozers, excavators, skid steer loaders, telehandlers, and more.
- Work Tool attachments available for any make or model or machine.

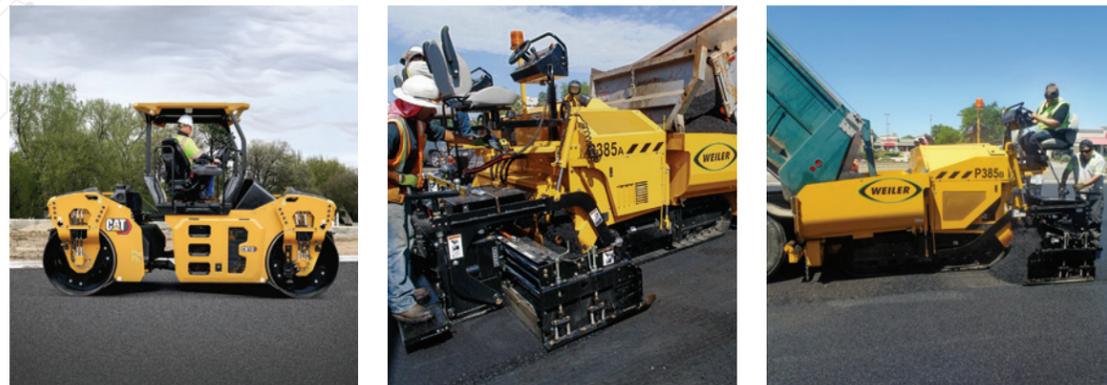

- Augers
- Cold Planers
- Mulchers
- Thumbs
- Truss Booms

INDUSTRIAL AND MARINE »

Perform with the power of Cat® – with their reliable industrial diesel and gas engines, you can power equipment throughout your industry, from fire pumps and grinders to locomotives. Cat diesel engines cover the widest power range in the industry, from 10 to 6,598 bhp. Cat gas engines fit a wide range of industrial applications and carry ratings from 95 to 5045 bhp. And like other Cat equipment, these industrial diesel and gas engines are built to last.

Our experienced team is ready to help you determine the solution for your specific needs. And when it comes to product support – no matter what you need, from a replacement part and routine maintenance to an emergency service call, you can trust our expertly trained field service technicians to help you stay productive.

- ACERT™ technology delivers industry-leading fuel efficiency
- Technology-focused approach to service means fast communication and real-time troubleshooting

- Industrial/OEM diesel and gas engines
- Fire pumps
- Industrial Open Power Units

Cat® marine power is the reliable choice for marine businesses focused on eliminating downtime and maximizing productivity, offering medium- and high-speed marine diesel engines as well as auxiliary engines and generator sets. Cat diesel engines have been serving commercial vessel operators for nearly 80 years. Caterpillar engines can be used for propulsion as well as in generator sets to supply the power to operate conveyors, pumps, winches, and other essential equipment.

Yancey Power offers a complete line of Cat marine products to meet our clients' unique vessel and location requirements, making us the top choice for pleasure craft, general cargo, inland waterway, tug and salvage, dredge, and more.

- The broadest selection of power ranges to efficiently meet commercial applications
- Maximum control over operating speeds for consistent performance
- Durability, fuel efficiency, easy maintenance, and extended service life for lower owning and operating expenses

- Engine Power solutions ranging from 10 to 6,598 bhp
- Vessel controls and displays
- Main propulsion and onboard power supplies
- Complete Cat marine power systems

PRODUCT SUPPORT SERVICES »

SHOP SERVICE

Whether you are looking for field or shop service support, welding/fabrication work, hydraulic repairs, or a fully equipped machine shop, Yancey has the facilities and personnel to meet your needs. We offer the most complete line of product support for your Caterpillar equipment. Our goal is to develop a product support strategy with you, to optimize the performance of your equipment, and lower operating costs.

Our service shops have specialized areas equipped with state of the art diagnostic tools to help repair and troubleshoot your equipment's engine, transmission, hydraulics, undercarriage, and other power train related components. Our field service technicians have laptop computers with the latest Caterpillar diagnostic programs. With these capabilities, our service technicians and vehicles can be dispatched to your job site to complete needed repairs quickly.

- Dedicated resources for all types of services and repairs involving engines, transmissions, other power train related components, undercarriage, hydraulics, fabrication, painting, and fluid analysis
- Multiple facilities, field service vehicles, and numerous trained service personnel
- Fully equipped machine shops can repair or salvage many expensive parts

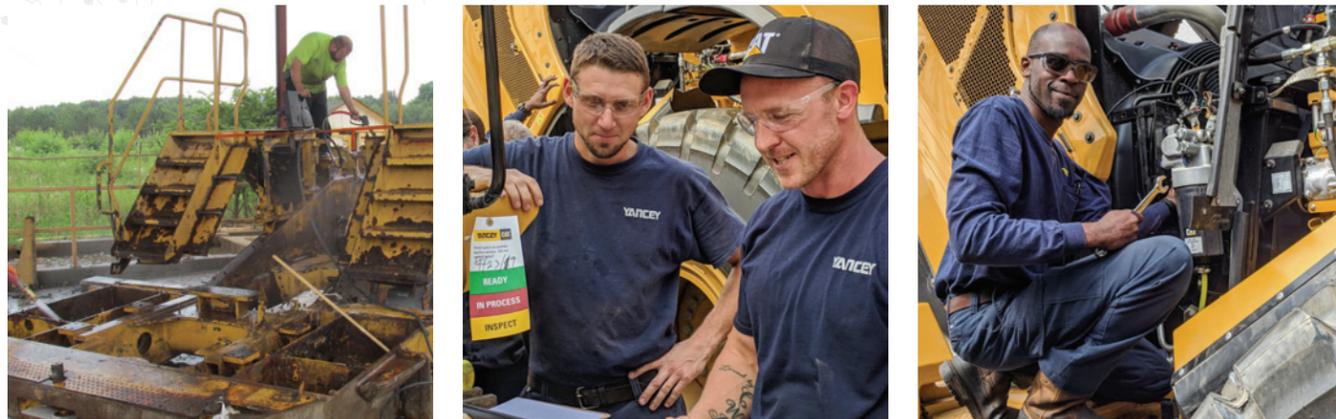

- Hydraulic cylinder repair services
- Hydraulic hose services
- Engine and line reboring
- Engine cylinder reconditioning
- Fabrication and custom fabrication
- Welding
- Caterpillar Certified rebuilds
- Caterpillar Certified Power Train rebuilds
- Scheduled Oil Sampling (S•O•SSM) fluid analysis
- Preventive Maintenance services

FIELD SERVICE

At Yancey Bros. Co., our Field Service is there when you need us – available 24/7 year-round with a minimum response time guarantee. Our well-trained technicians receive a minimum of 40 hours of ongoing training every year, and our fully equipped service vehicles include:

- Laptops with all parts, service manuals, and technical information
- Necessary tooling and diagnostic equipment to make on-site repairs
- Parts inventories maintained by accurate call and demand logic

MAINTENANCE PROGRAMS

Take a load off your mind with Yancey's maintenance programs. Our Planned Maintenance provides a complete operational inspection by a trained technician; ensures your equipment is professionally serviced and maintained; helps lower operating costs and prevents unscheduled service calls and downtime; and includes an annual fleet maintenance cost analysis.

Our Full Maintenance provides fixed costs that allow you to accurately budget your equipment maintenance; minimizes time spent managing equipment expense; provides fleet management support and allows you to focus on your core business.

MACHINE SHOP & FIELD LINE BORING

As a member of your team, Yancey is committed to keeping your equipment running by providing the best technicians and tooling available in the region. To stay focused on your needs, our technicians specialize in specific equipment and use state-of-the-art diagnostic tools to maximize your equipment's potential.

CUSTOMER VALUE AGREEMENT

Every piece of Cat® equipment is designed to provide maximum productivity and operating economy throughout its working life. At Yancey, we can help you maintain that built-in value with a Customer Value Agreement (CSA) tailored to the needs of your fleet.

HYDRAULICS

Hydraulic pump and motor repair is an important service to maximize the life of your equipment. That's why Yancey has several repair and rebuilding options that save you the cost of replacing expensive hydraulic components while restoring your equipment to like-new conditions.

HOSE & COUPLINGS

We're your one-stop hydraulic hose repair shop for all Cat and allied brand equipment.

CYLINDER REPAIR

Our hydraulic repair shop is fully equipped to perform reseals, honing, retubing, and more.

REBUILDS

Cat machines keep on going, thanks to their modular components and our certified rebuild programs.

GENERATOR MAINTENANCE AND GENERATOR CVA'S »

Our service team is comprised of factory-trained, certified technicians, and highly trained engineers and support staff to keep your crucial electrical systems running smoothly. Yancey Power Systems can provide and service a fully integrated power envelope solution for your facility.

We Service more than just Cat gensets! Our techs are experienced with a variety of makes including:

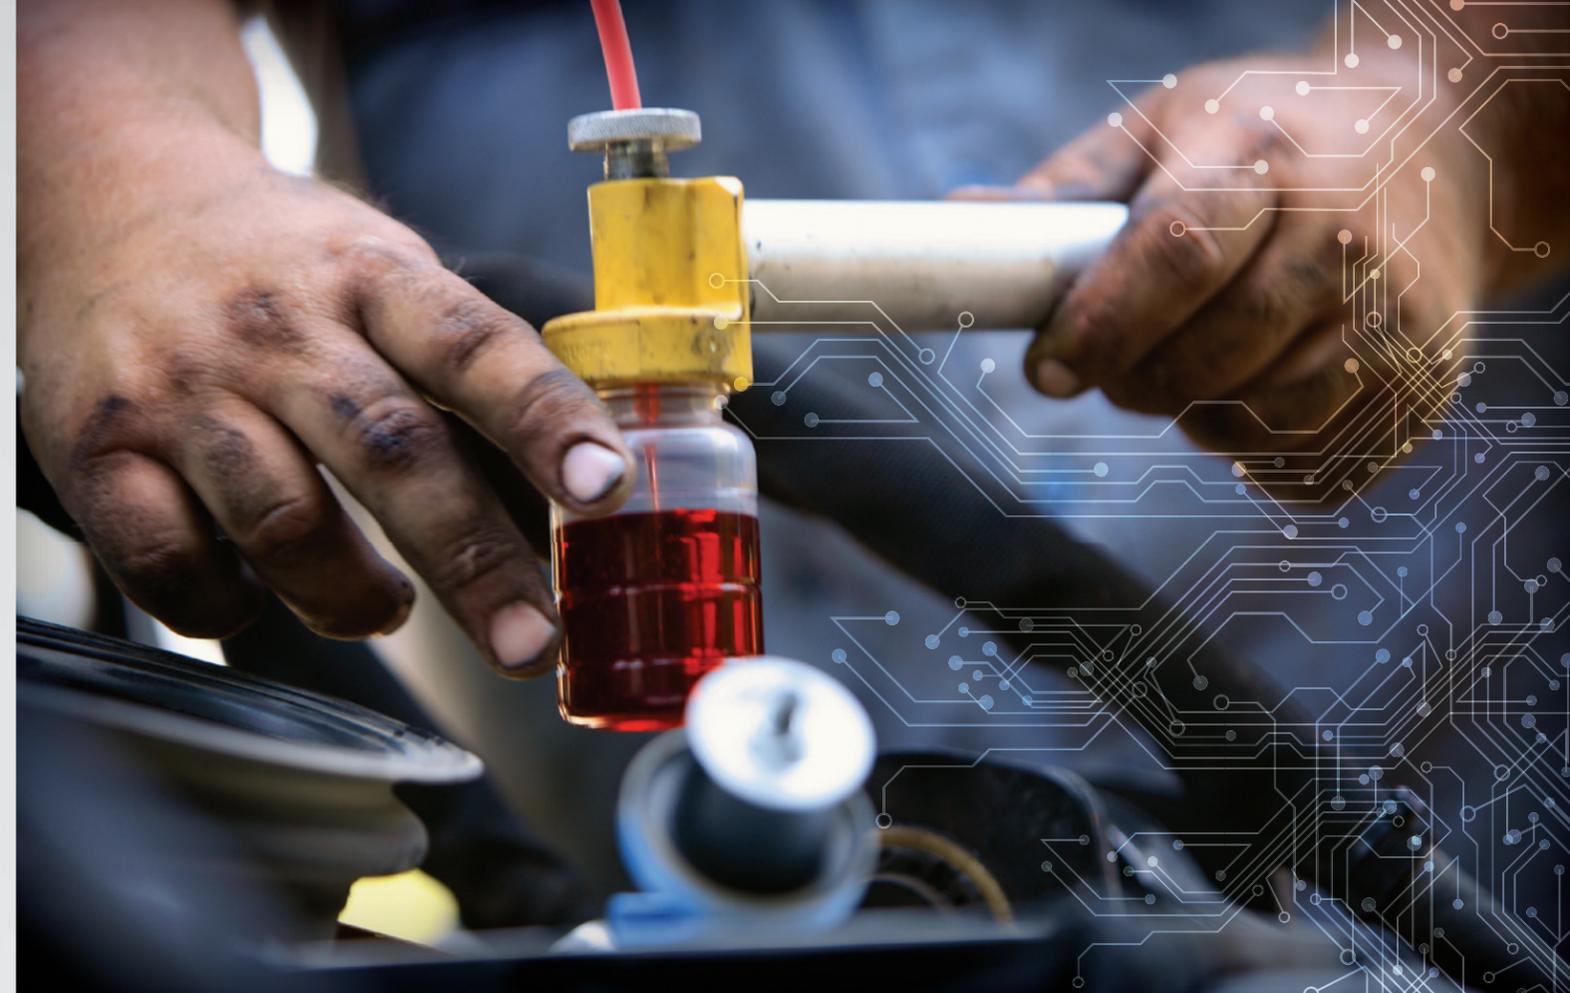

- Caterpillar
- Cummins
- Kohler

Fuel Analysis

- Condition
- Contamination

CONDITION MONITORING »

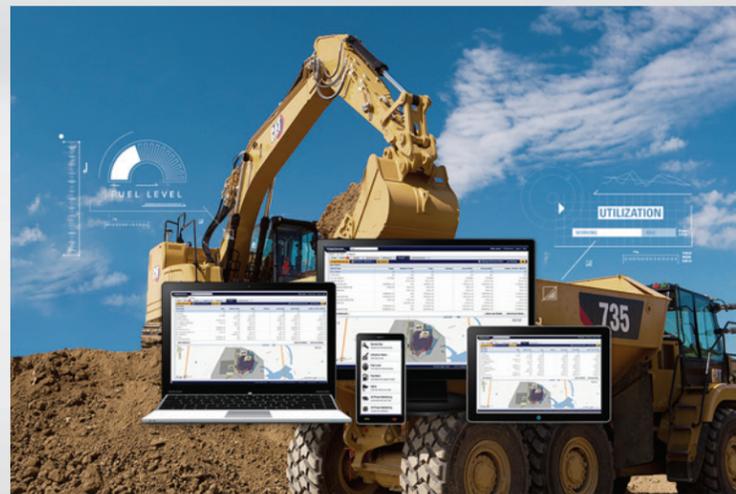

TURN YOUR DATA INTO PROFIT

The assets on your job site have a story to tell. To understand the entire narrative, you need more than a box and slick software. You need perspective, and the kind that can only be gained by spending decades in the dirt. Yancey appreciates the opportunity to put our perspective to work for you. We're sold on the value of connectivity, not just because the technology is available, but because it's delivering big benefits worldwide.

Cat® trained Condition Monitoring Analyst review and inform:

- + Repair and Component History
- + Telematics Data – events & diagnosis
- + Inspection Items to Address
- + Fluid Sampling Items to Address

Event reports sent to consolidate large amounts of related events. Allows you to manage your operation while we monitor your fleet.

PARTS.CAT.COM »

With Parts.Cat.com, you have more than 1.4 million Cat® Parts at your fingertips. It is the next evolution from Yancey in buying Cat Parts online, and it is easier than ever.
